LOGIXO

DISTRIBUTION BUSINESS MANAGEMENT SYSTEM

✦ GROWTH PLAN ✦

Overview

Logixo is a purpose-built solution for modern distribution businesses. It brings every critical operation — sales, collections, finance, fleet, and workforce — into one powerful, unified system.

No more scattered notebooks. No more untracked cheques. No more end-of-day guesswork. With Logixo, you gain complete visibility and control over your entire distribution operation from a single dashboard.

The Growth Plan gives you all the tools and insights to scale your distribution business efficiently — full fleet and delivery management layered on top of the complete billing and finance foundation — with clarity, confidence, and complete control at every stage of growth.

Pricing

Plan	Monthly	Yearly (Save 2 Months!)
Growth Plan	**Rs. 19,900** per month	**Rs. 199,000** per year

☑ No hidden charges • Cancel anytime • Full support included

Who Is This Plan For?

The Growth Plan is built for expanding distribution businesses and ambitious operators who need more than just billing — they need full fleet visibility, real-time delivery tracking, and the operational muscle to scale with confidence.

This plan is the perfect fit if you:

- Run a growing wholesale or distribution operation with multiple vehicles, drivers, and routes
- Need full fleet management — vehicle register, live dashboards, proactive maintenance alerts, and fitness certificate tracking
- Want to plan and monitor daily delivery runs with odometer capture and van stock tracking
- Require comprehensive reporting including expense breakdowns alongside sales and credit reports

- Are ready to move from reactive management to proactive, data-driven operations

Core Features

The Growth Plan includes all Starter Plan features — Dashboard, Bill Management, Credit Management, Cheque Management, and Expense Management — plus the additional modules below.

Dashboard

Real-time KPI cards: Today's Sales, Cash Collected, Pending Cheques, Deposited Cheques, and Outstanding Credit. 7-day sales trend chart, payment distribution donut, Top Routes leaderboard, and Recent Activity table — all filterable by date.

Bill Management

Create, edit, view, and print professional invoices. Track each bill from issuance to full settlement across cash, cheque, and credit payment modes. Filter by date, vehicle, route, and shop. Bulk PDF download and deep-link support included.

Credit Management

Outstanding credit balances per shop with real-time aging. Balances feed the Credit Age Analysis report for full receivables visibility. Protect cash flow before dues become bad debt.

Cheque Management

Structured cheque register tracking Pending, Cleared, and Returned statuses with due-date alerts. Accessible directly from the bill list for fast daily reconciliation.

Expense Management

Log daily operational costs by category, sub-category, and vehicle. Expenses are separated from revenue for accurate daily profitability and feed into the Expense Report automatically.

Vehicle & Fleet Management

Take full command of your delivery fleet. Register every vehicle with its type, registration number, production year, and assigned routes and clerks. Track fitness report dates, grease nipple service schedules, and differential oil intervals — and receive proactive alerts before any compliance deadline is missed. Activate or deactivate vehicles with a single toggle. The vehicle dashboard gives you a real-time operational view of your entire fleet at a glance.

Route Plans & Deliveries

Plan daily delivery runs by assigning a vehicle and route in advance. When the driver departs, record the start odometer reading and capture a photo — then again on return. The system tracks mileage per run automatically. Van Stock loading dialogs record what inventory the vehicle carries on each route. View live route maps for any plan. Statuses progress through Planned → In Progress → Completed, with cancellation available at any stage. Role-based controls ensure only authorised staff can start, end, or edit deliveries.

Report Features

Day Summary Report

Consolidated end-of-day snapshot — total bills issued, cash collected, cheques received, credit extended, and expenses incurred — in a single printable view. Filter by company, routes, and vehicles. Footer row totals every numeric column for instant reconciliation.

Credit Age Analysis Report

Four colour-coded aging buckets (1–10, 11–20, 21–30, 30+ days) with drill-down to individual bills. Identify overdue balances before they become unrecoverable and prioritise collections with precision.

Expense Report

Full expense analysis for any date range. Filter by expense category, sub-category, and vehicle. Summary KPI cards show Total Expenses, Transaction Count, Category Count, and Average per Transaction. Category breakdown cards highlight the top cost centres with amounts, counts, and percentage of total spend. The detail grid groups rows by category and sub-category so you can see exactly where margins can be improved.

Admin & Setup Features

Supplier Management

Organised supplier directory with contact details, payment terms (Net N days), and active/inactive status. Used across the system for invoice reconciliation and reordering.

Route Management

Define delivery routes, assign shops, and activate or deactivate routes. Routes are used as filters throughout billing, reports, and route planning.

Vehicle Type Management

Standardise vehicle categories (van, lorry, three-wheeler, etc.) used across assignments, route logs, and operational reports.

Warehouse Management

Define warehouse locations and access controls. All stock movements reference a specific warehouse so inventory is always traceable.

Shop Management

Complete customer outlet directory — address, owner, route, category, credit limit, and GPS map link. Generate QR codes for fast field scanning. Search and filter across your entire customer base.

User Management & Account Settings

Role-based access for Owner, Admin, Manager, Office Clerk, Sales Rep, and Delivery Personnel. Each role controls module visibility and edit permissions. Configure company identity, currency, and tax settings in Account Settings.
